<u>Progress report</u>

- Initial Design
  - Key Concepts
    - Project (description page<advisors and people they are contacting, collaborators>,add video to description, editing form)
      - Progress: implemented back-end using Paperclip for media implementation
    - Updates (media for updates<gist of code interesting or difficult>, advice format<private and public communication or use emails>)
      - Progress: use emails for private conversation
    - Donors (payment system<stripe>)
      - Progress: Learning the Stripe API
    - Alums/Students<how to handle cross registration and stuff so maybe just certificates?>(authentication : email <devise, use certificates>)
      - Progress: Created the user model for Student and Email, and set up basic emailing
  - Features
    - filtering or matching<types of projects, certain people, keywords.. require profile, same for everyone?>
      - Progress: Match between user's information and project's info
    - Posting updates (youtube, pictures, text)
      - Progress: Made Update model
    - advice/commenting on projects
      - Progress: Yet to come
    - secure payment system
      - Progress: Yet to come
    - <donate anonymous, design challenges>
      - Progress: Yet to come
      -

- ○ Wireframe (Similar site's UI - fine)
- ○ Data Model

- ● Third Party Library (Paypal or Venmo)

- ● Feedback on the presentation

- ● MVP(Subset of Features to implement)
    - ○ posting updates(text, pictures, youtube link)
    - ○ secure payment system
    - ○ comment / advice section
    - ○ authentication of email
    - ○ <privacy setting stuff seen by donors and students and everyone else>
